

What the NAB still has not learned is that those of us who PAY for satellite radio, do so because we are fed up with free radio. Yesterday , on a high power major metro station, I heard the same lousy played-out song 9 TIMES in 7 hours! Not to mention the same 4 commercials over and over again. Just like You, the FCC have no right to dictate what I listen to (although you are trying REAL hard with your crusade against Howard Stern), the NAB has no right to tell me that I HAVE to listen to one of THEIR stations to get my traffic and weather reports.
